

BPO Convergence Pvt Ltd User Access Review Procedure for Level 1 Systems

1.0 Background

BPO Convergence Pvt Ltd Security Policy on Access Control requires an access review to be conducted annually for information assets (systems/applications) containing protected data. The results of the review must be documented.

The following procedure is intended to comply with this Access Control Policy.

2.0 Scope

All systems that contain protected information assets classified as level 1/confidential/Personally Identifiable Information (PII). This includes all the centers, workstations, applications, servers, databases, etc.

Administrative access includes any access assigned to users that is in addition to any self-service type of access. The administrator responsible for conducting the review must not have Account Administrator permission. See below for the types of roles and responsibility that may be assigned for users with administrative access.

Role	Responsibility
Account Holder	The individual or group which is assigned to the Account. This could be a privileged or general account.
Privileged Account	An account that may have administration access to configure setup, security administration, interface configurations, development(coding), daily batch jobs, data extract, etc.,
Security Administrator	Those who support Accounts by adding, modifying, assigning passwords, or other account management actions.
System/Service Administrators	Those who are members of organizational units that support enterprise, division, or department level IT services. System/Service administrators within their area of responsibility facilitate end-user privilege management and implement operating procedures to conform to campus information security standards and guidelines.
System/Service Owner	The system owner is ultimately responsible for providing the system's service/functionality to the campus. Often the system owner is a manager/director, department chair, or dean.
Data Owner	The data owner is responsible for establishing procedures for granting and revoking access privileges.

3.0 Procedure

The steps below outline the procedure/process to coordinate the review from initial reports generation to the final step of certifying the overall process.

3.1	Create list of roles/template	Create a list of roles and/or templates that are used to control access to the system/service. Example: administrative roles, user roles, privileged access roles. Role: a standard template created and assigned to user(s) based on operational need
-----	-------------------------------	---

BPO Convergence Pvt Ltd User Access Review Procedure for Level 1 Systems

3.2	Create access report	Generate a report on active users and the roles assigned for each user. Note: standard user accounts that have access to their own data do not need to be included in the report.
3.3	Audit access report	<p>Conduct a comprehensive review of the list of users and roles at a minimum:</p> <ol style="list-style-type: none"> 1) Is this an active employee? 2) Has their job or responsibilities changed? 3) Do they have appropriate access (least privilege)? 4) Is the employee current with Data Security & Privacy Training? 5) Is this a shared account (i.e. do more than one person know the password)?
3.4	Mark action needed	Mark any users and/or privileged roles/templates that may need to be removed or changed in the access report. Example: create an additional column for notes in the access report.
3.5	Certification	<p>Document the access review activity using the template provided in Adobe Sign. Route it for review/signature to the Data Owner. It is the responsibility of the administrator responsible to certify the access review.</p> <p>Include an appendix for additional descriptions and/or information that may not fit in the template</p>
3.6	Submit	Submit the completed review to the Information Security Office

4.0 Activity Timeline

The Information Security Office will use the application inventory database to identify all level 1 systems and assigned System Owners to coordinate the review, annually at a minimum.

Task	Timeline	Owner
<ol style="list-style-type: none"> 1. Coordinate/setup check ins with System Owners in early October 2. Conduct workshop sessions to provide an overview of the access review process 3. Notify Systems Owners, Data Owners, Vice Presidents and Deans 	October	Information Security Office, Data Owners
4. Work with the System Owners to document the access review template using the template in section 5.0 and route for approvals through Adobe Sign	November – December	Information Security Office
<ol style="list-style-type: none"> 5. Review completed access review reports for accuracy 6. Inventory and update application inventory database to note date of review 	January	Information Security Office
7. Summarize the review process and present to Data Owners for review/approval		

BPO Convergence Pvt Ltd User Access Review Procedure for Level 1 Systems

8. Present summary reports for review to Information Security Officer/Chief Information Officer	February	Information Security Office
9. Certify the annual access review process with the Vice President/Chief Information Officer in February		

5.0 Access Review Template

ANNUAL ACCESS REVIEW FOR LEVEL 1 SYSTEMS

To: Information Security Office

In accordance with System wide Information Security Policy on Access Control 8060.0 and BPO Convergence Pvt Ltd Level 1 Systems Access Review procedures, I/we have conducted a review of the level 1 systems that are under my purview.

Division Name	BPOC-Bhubaneshwar, Asansol,Guwahati,Mohali
